

got 3 warnings.

incomplete input declaration of ~~str~~ str, str, str
143, 147, 150

John says: #include <string.h> free this!

☆ why did the header say `char* str` 2.1
was used whereas my really old
PG Ian memo says 2.3 was
used? → it's a header bug.

It ran successfully and I see an
I-map.

Peak is .0033922, pixel (5,4)
I -5.30353 e-5, pixel (6,8) ✓

Now look at the one ~~in~~ in my
March directory
