

April 23

trying to get sharpinteg compiled  
and working.

test file is <sup>40543</sup>~~40545~~ in "March"  
subdirectory of L1527 directory on my  
mac.

made using:

★ sharpinteg-2 -r rgm-350-2007nov.dat  
-f 1 -w -sil -em

I made this a year ago w/ version 2.1  
of sharpinteg.

The rgm file is on the web site, &  
it has the right name.

careful I may need the -dynamic flag  
that is (in Henry's makefile) not  
used except for the IDL stuff.

copied exactly what I did for  
sharpcombine... except for the -dynamic
