

the same on zamin and my mac,
although oddly I can't seem to reproduce
what I have in this logbook. (Though
its close).

~~Maybe I was working with John's~~

Moved fitgauss into my Pipeline/bin
directory.

The reason I couldn't reproduce what's in
my logbook was I was using a
sharpteg made without the -w flag.
Of course this will have different
pointing (b.g. 1.5" in AZ, it threw out)

I verified the #s on p. 80, but without
using "p" or "b" flags. Its not clear that
these work anyway. I was using dashes
before them, which seems to have no
effect
